

TERRASTOP

SILT FENCE

# CASE STUDY

*National Grid PLC - Felindre to Brecon, Wales*  
June 2008

For this project, National Grid PLC used our Terrastop Premium Silt Fence for a huge pipeline project in Wales. The Silt fence was used on the construction site from Feliindre to Brecon - as their activities resulted in bare ground being vulnerable to weather erosion.

A large number of silt fences were installed on the site to help capture stormwater run-off pollution.

National Grid were so pleased with the outcome that they sent us photos of the timeline of the project's development from start to finish.
